

THE 2023 SEAFOOD AND FISHERIES EMERGING TECHNOLOGIES BIENNIAL CONFERENCE

IMPACT AT SCALE FOR A SUSTAINABLE AND RESILIENT FUTURE

SPONSORSHIP PROSPECTUS

SAFET

SEAFOOD AND FISHERIES
EMERGING TECHNOLOGIES

3-5 OCTOBER 2023 | BALI | INDONESIA

www.safet.fish

WELCOME

SAFET provides a platform and space for global networking of technology developers and implementers. Together we are committed to addressing the biggest challenges in the seafood and fisheries world. Emerging technologies play a key role to address issues such as environmental sustainability, social responsibility, provenance, equity, and economic viability.

We believe there is a growing need for a central convening force in the fisheries and seafood technology space, one which better connects technology providers with implementers, increases the flow of information between developers and stakeholders, enables adoption and scale, does these things actively, and one that is truly global in scope. The theme for the 2023 biennial conference is **Impact at Scale for a Sustainable and Resilient Future.**

SAFET MISSION

To realize the full potential of emerging technologies that ensure the sustainability and resilience of fisheries and the communities that depend on them.

GOALS OF THE CONFERENCE

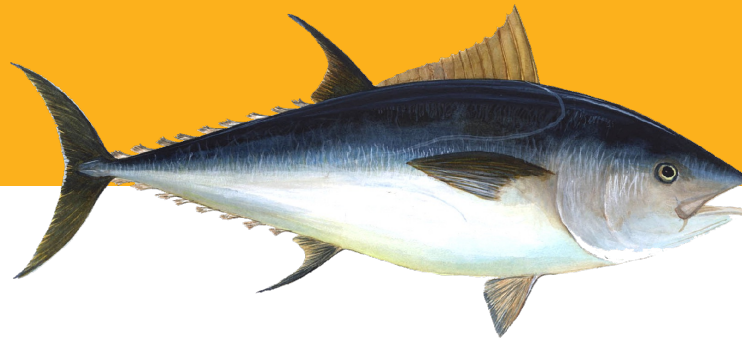

- Provide a Forum for Emerging and Disruptive Technologies
- Connect Tech Providers with Innovative Practitioners
- Advance Implementation of Innovative Ocean Technologies

SPONSORSHIP PACKAGES
